

**Please amend the present application as follows:**

**Claims**

The following is a copy of Applicants' claims that identifies language being added with underlining ("\_\_\_\_") and language being deleted with strikethrough ("~~—~~"), as is applicable:

1. (Currently Amended) A method of discovering local devices or services comprising:

associating at least one unique identifier with at least one location;

associating one or more device ~~or service~~ with said at least one unique identifier based upon a unique identifier acquired by each device at a location associated with the unique identifier;

providing an indication of said one or more device or service that are associated with said at least one unique identifier, such that a first device associated with a first unique identifier is made aware of other devices or services that are available for use and are associated with the first unique identifier.

2. (Original) The method of claim 1, wherein associating said one or more device or service comprises associating multiple devices or services with said at least one unique identifier.

3. (Original) The method of claim 2, said associating multiple devices or services with said at least one unique identifier comprises associating multiple different devices or services with said at least one unique identifier.

4. (Original) The method of claim 1, wherein said providing comprises: receiving a message containing at least one unique identifier; ascertaining said one or more device or service based upon said at least one unique identifier; and replying to a sender of the message with a list of available devices or services for a location corresponding to said at least one unique identifier.

5. (Original) The method of claim 4, wherein said acts of receiving and replying are accomplished via a network.

6. (Original) The method of claim 4, wherein said acts of receiving and replying are accomplished via the Internet.

7. (Currently Amended) One or more computer-readable media having computer-readable instructions thereon which, when executed by one or more processors, cause the one or more processors to:

associate at least one unique identifier with at least one location;

associate one or more device ~~or service~~ with said at least one unique identifier based upon a unique identifier acquired by each device at a location associated with the unique identifier; and

provide an indication of said one or more device or service that are associated with said at least one unique identifier by:

receiving a message containing ~~at least one~~ a first unique identifier;

ascertaining said one or more device or service currently available for use to a sender of the message based upon said ~~at least one unique identifier~~ first unique identifier; and

replying to a the sender of the message with a list of available devices or services for a location corresponding to said ~~at least one unique~~ first identifier.

8. (Original) A server embodying the one or more computer-readable media of claim 7.

9. (Currently Amended) A method of discovering local devices or services comprising:

associating multiple unique identifiers with multiple related locations, each related location having a unique identifier;

receiving a report that a device has acquired a unique identifier corresponding to particular location, the device being located at the particular location;

associating one or more device ~~or service~~ with one or more of the unique identifiers based on reports received from said one or more device, the one or more device or service being accessible from a location that corresponds to a unique identifier;

receiving a message from a client device that contains a unique identifier of one or more of the locations;

ascertaining from said unique identifier any devices or services that are associated with a location that corresponds to said unique identifier; and

replying to said client device with a list of available devices or services for the location, wherein said available devices on the list reported acquisition of said unique identifier.

10. (Original) The method of claim 9, wherein said acts of receiving and replying are accomplished via a network.

11. (Original) The method of claim 9, wherein said acts of receiving and replying are accomplished via the Internet.

12-17. (Withdrawn)

18. (Currently Amended) A method of discovering local devices comprising:  
acquiring a unique identifier that is associated with a location for which one or more corresponding devices or services are desired to be discovered;  
sending a message containing the unique identifier over a network and to an entity from which the devices or services can be discovered; and  
receiving a reply from the entity, the reply containing a list of available devices or services for the location, wherein the available devices acquired the unique identifier at the location and reported acquisition of the unique identifier to the entity.

19. (Original) The method of claim 18, wherein said acquiring comprises receiving manually entered data comprising the unique identifier.

20. (Original) The method of claim 18, wherein said acquiring comprises automatically acquiring the unique identifier with the client device.

21. (Original) The method of claim 18, wherein said acts of sending and receiving comprise doing so via the Internet.

22. (Currently Amended) One or more computer-readable media having computer-readable instructions thereon which, when executed by one or more processors, cause the one or more processors to:

acquire a unique identifier that is associated with a location for which one or more corresponding devices or services are desired to be discovered;

send a message containing the unique identifier over the Internet and to an entity from which the devices or services can be discovered; and

receive a reply from the entity, the reply containing a list of available devices or services for the location, wherein the available devices acquired the unique identifier at the location and reported acquisition of the unique identifier to the entity.

23. (Original) A client device embodying the one or more computer-readable media of claim 22.

24-25. (Withdrawn)
